Hi Alexandra,

Good timing on your part, and yes, I can absolutely help.

We have seen natural gas pricing come down a good amount over the last couple of months, and a lot of people taking advantage of their desired percentage to lock in, or at least a portion. Good storage levels and weather outlets calling for a warmer winter have been the main drivers.

If you wanted to do a lock your 80% of expected usage for Nov 26 - Oct 27, a fixed price is currently down to \$3.78/dth (\$0.378/therm), and if you just looked at the winter months of Nov 2026 - Mar 2027, pricing is \$4.14.

Please call or email me with any questions on anything. If you want me to get a percentage locked in, let me know what percentage and term and I can get it done.

Thank you!

Eric
