

Assistant Superintendent of Learning October Board Report

Goal One – Student Learning

Goal 1 Strategic Planning Work Session

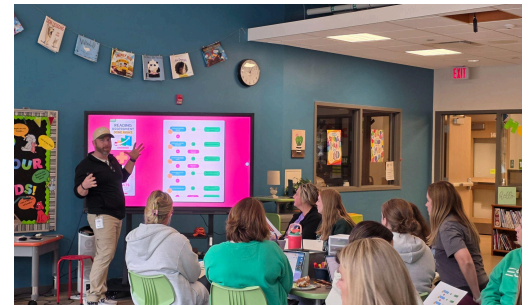

The Goal 1 (Student Learning) subcommittee for our District Strategic Planning Committee will be meeting on Wednesday, October 7th for a sub committee work session. The focus of this work session will be to utilize feedback from the September 23rd strategic plan meeting in order to revise both the proposed focus area goals and action steps for student learning. Revised goals and action steps will be shared with all members of the strategic planning committee in October.

September SIP Day

During the September 25th School Improvement Planning (SIP) Day, staff across all three buildings engaged in targeted professional development aligned with our district priorities and the "Make Learning Loud" theme. Key focus areas across the district included training for use of our two-factor authentication system, which is a critical step in improving digital safety and security protocols. Some staff also engaged in sessions to further their

knowledge of digital tools such as ParentSquare, Skyward, and Panorama. Teams at Ide and Prairieview focused on

learning new strategies to refine the use of assessment data to support student growth and targeted skill development through differentiation of instruction and WIN (What I Need) time. At Lakeview, staff engaged in an initial school schedule visioning process. The purpose of this process was to explore what is currently working in the building schedule, identify structures that need to be revised or revisited to continue to improve, and determine

areas that need to be further considered and researched to create a schedule that further supports district goals for learning and enhances programming for students through innovative practices and offerings. Teams at Lakeview also engaged in discussions and planning around restructuring spring conferences.

Competency Based Education (CBE) Guiding Coalition

Following staff attendance at the national Marzano Mastery Conference this past summer, the district established a Competency-Based Education (CBE) Guiding Coalition to foster K–8 alignment across curriculum, instruction, and assessment practices. The coalition held its first meeting on September 28th to review feedback from the conference and compare findings from our recent curriculum audit. Both data sources highlighted district strengths, including high-quality instructional practices and exceptional educator commitment. Moving forward, key actions to continue to refine our work as a district with the implementation of CBE include taking steps to align our framework K–8 with consistent priority statements, clear learning progressions, and professional development to build long-term staff capacity. The coalition will help guide the work for systemic implementation and professional learning opportunities to support staff throughout this continuous journey of improvement.

Coming Soon: Skyward Missing Assignment Alerts for Lakeview Parents/Guardians

We are activating Skyward's automated alert system to notify Lakeview parents via email and within the Skyward Message hub when their child has a missing assignment. To support families through this update, staff are creating a step-by-step parent guide with screenshots explaining how to view assignment details once an alert is received. Our goal with this tool is to strengthen home-school communication around student work habits while fostering student responsibility for learning.
