MULTI-CAMPUS SCIENCE ROOM CONVERSIONS

SCIENCE ROOM CONVERSIONS

Renovations are planned at Windsong Elementary School and Zue S. Bales Intermediate School during the first half of 2027. The renovations will provide updated flexible learning space that will allow for a variety of learning opportunities to take place. The renovations to both campuses will include the installation of additional casework and plumbing. Minimal saw cutting of the existing slab will be necessary to install the new plumbing fixtures. Both campuses will receive new luxury vinyl tile flooring and magnetic writable wall surfacing. Power and data will be relocated and updated as necessary to be fully coordinated with the new layouts.
