

## Chromebook Insurance

I also want to remind families about Chromebook insurance. Although HVHS students do not necessarily carry an individually assigned Chromebook throughout the entire school year, purchasing insurance is still important.

Students may check out Chromebooks for AP classes, Edgenuity courses, special projects, or other academic needs. When a Chromebook is checked out to a student, that device becomes the student's responsibility during the checkout period. Accidents can happen, even during a temporary checkout. Chromebook insurance helps protect the student, the family, and the school from the costs associated with accidental damage.

If you have not purchased Chromebook insurance for your student, please see Anja in Bookkeeping to have insurance added to your student's account.

## What a Day to Be a Mustang!

Last week, Hidden Valley had the privilege of hosting our first-ever HVHS Career/Job Fair, presented by JCF, and what an incredible event it was!

More than 800 students from Hidden Valley, North Valley, Illinois Valley, New Hope, SOSA, and the JP Transition Center participated, with 47 vendors representing colleges, careers, trades, businesses, military branches, and other post-secondary opportunities.

Most importantly, our students SHINED!

They were engaged, respectful, curious, and represented Hidden Valley incredibly well. Watching our students interact with professionals, ask questions, explore opportunities, and think about their futures was a tremendous source of pride. In fact, the way our students carried themselves throughout the Career/Job Fair was a wonderful example of Mustang P.W.R. in action.

Thank you to JCF, our participating schools and vendors, our staff, and everyone who helped make the day possible. It truly was one of those days when you couldn't help but be proud to be a Mustang!
