

Technology Update

October 2026

The Technology Department continues to focus on day-to-day support, system reliability, cybersecurity, and maintaining technology services across the district.

Highlights

- **District Phone System:** The districtwide transition to the new phone system has now been completed. This closes out a major technology project that has been underway over the past several months.
- **High School Intercom / Clock System:** The High School Valcom intercom project is nearing full completion. The remaining clocks that had been delayed due to a manufacturer's backorder are being installed this week.
- **Ongoing Technology Support:** Technology staff continue to focus on system reliability, cybersecurity, classroom support, and future infrastructure planning.

Overall, October represents the completion of several significant infrastructure projects that have been in progress throughout the spring and summer. With the phone system transition complete and the final High School clocks being installed, the Technology Department is shifting its focus from major project implementation back toward ongoing support, maintenance, and future planning.
