

Consider Approval of Information Technology Listed Preferred Vendors for the 2026-2027 Fiscal Year, Which Are Anticipated to Have Goods and/or Services Purchased in an Amount Greater Than \$100,000

As part of the College's annual purchasing review, administration identified additional vendors with whom aggregate purchases of goods and/or services are reasonably anticipated to exceed \$100,000 during the 2026–2027 fiscal year.

Presenting these vendors to the Board provides advance notice and approval of anticipated aggregate expenditures that may exceed the \$100,000 threshold.

Based on anticipated College needs and purchasing activity, administration has identified the following additional Information Technology vendors:

Vendor/Provider	Service/Contract Area	Procurement Method
Dell Technologies	Computer hardware, servers, storage, technology infrastructure, software, accessories, and related technology products and services	Cooperative purchasing contracts
DataVox	Networking, communications, security, technology infrastructure, equipment, and related technology products and services	Cooperative purchasing contracts
Triumph	Network cabling, technology infrastructure, equipment and related technology products and services	Cooperative purchasing contracts
Design Security Controls (DSC)	Video surveillance equipment and accessories	Cooperative purchasing contracts

Inclusion on this list does not obligate the College to make purchases from a vendor or indicate that expenditures will necessarily exceed \$100,000. All purchases remain subject to available budgeted funds and applicable College purchasing policies and procurement requirements.

Vendors associated with contracts, competitive bids, or other purchases that have already received separate Board approval are not included solely on the basis of those previously

approved expenditures. Additionally, individual projects or purchases requiring separate Board approval will continue to be presented to the Board as required.

It is recommended that the Board of Regents approve Dell Technologies, DataVox, Triumph, and Design Security Controls (DSC) as additional preferred Information Technology vendors for the 2026–2027 fiscal year
