Subject: Beginning of Year Progress Monitoring Data

MISD Board of Trustees: October 20, 2026

Agenda Item – 8B

Background Information

Midway ISD tracks student growth through three performance tools: Tango LION, IXL, and NWEA MAP. The Assessments provide individual student progress data through Beginning of Year, Middle of Year, and End of Year Assessments. Administrators, Specialists, and teachers use the data to focus on individual students' growth areas.

NWEA MAP Growth, used as the district reading screener, is a nationally normed, adaptive test that determines a student's current level of achievement throughout the school year. The platform uses the RiT score to show a student's current achievement level and track individual growth. Tango LION, the district math screener, measures individual student mastery of the Texas Essential Knowledge and Skills throughout the year and reports whether a student is meeting grade-level expectations based on the content covered to date. The district currently uses the IXL platform in middle grades Reading and Math to determine achievement levels. In addition to collecting one-time screener data, the IXL platform also creates individualized lessons based on students' current proficiency levels.

Dr. Odajima will present the data captured for Midway students from previous school years, as well as the current BOY data.

Fiscal implications

None
