

ACTIVITIES, COMMUNITY ED, AND ASSESSMENT REPORT

October 2026

Wolves Extracurricular Activities

The fall sports season is winding down with soccer currently in their section tournament while football and volleyball will wrap up their regular seasons after the MEA break next week. We will begin switching gears to winter activities with the start of girls hockey practice on November 2nd.

In fine arts, our music soloists will be competing in the Section 8A contest at Bagley on Wednesday, November 4th to kick off their competitions for the 2026-2027 school year. In music, there is not a state-level event, so the section contests are our students' greatest opportunity to showcase their talents in a competitive environment.

We are asking the board to approve the MSHSL Foundation A Grant Resolution as we do on an annual basis to offset costs associated with our league-sponsored student activities.

Community Education

October is also a time of transition in Community Education as many of our fall enrichment and sports have finished for the season and planning for winter activities is well underway.

Upcoming highlights include the first annual Wolf Pack Run Club 5K race and the Youth Basketball Tipoff Event, both take place on Saturday, October 24th. The second session of swimming lessons at Chase on the Lake will begin on Tuesday, November 17th.

The winter season is also a busy time for community members looking to use our indoor facilities. Requests should be made through our [Facilities Reservations Bound webpage](#).

Assessment

We have finished up fall FastBridge testing in math and reading for our elementary and secondary students. Staff will use this data during their PLC sessions to organize small groups and plan for intervention instruction. Students in grades 4-12 who did not meet grade-level benchmarks in reading will be screened further with Capti to determine more specific instructional needs.

2026 summative MCA data is now available at the district, building, and grade levels for math, reading, and science. This can be found on the MDE website's [School Report Card page](#).
