

MHS School Board Report

October 2026

Attendance

For the month of September our attendance rate was down to 86.9%. There are many activities happening and there is still a lot of sickness impacting the school day.

We currently have 95 students enrolled at MHS. 4 of them are part time and attending electives.

Issues Within the High School

We have had several students that have had a vacation during the school day. Many of these students have done a great job of getting caught up and communicating in advance that they will be missing school. However, many of these students struggle to catch up.

We also continue to have outside of school issues that are coming into school. I have continued to forward things to the Metlakatla Police Department. I am concerned about what this may look like as it possibly shrinks and the support from social services.

Celebrations-

Our VB team had a great home event

We have two MHS students that have qualified for the Honor Fest: Myles Atkinson and Sarah Guthrie.

We had 13 students that successfully completed the first round of the CTE Intensive training. Many of them will receive work to complete while here at school. Our students left the intensives with the following experiences:

Wiring outlets and breaker boxes

First Aid Certifications

Creating a functioning APP for phones

Changing boat oil and boat motor maintenance

General Construction systems and management

Thank you to the HS staff in making sure that our students continue to get opportunities that connect to life after high school.
