I. New Business:

I.1. **Donations**

I.2. Discussion of Student Representation – The Board will discuss the possibility of including a student representative at School Board meetings. Information from another district and guidance from MSBA have been provided as examples for consideration. This item is intended for discussion and to determine whether the Board would like administration to further develop an approach for LPGE.

I.3. School Board Meeting Dates for 2027 – The Board will review proposed meeting dates for 2027. The proposed calendar generally continues the Board's regular meeting pattern. With newly elected members taking office in January, the Board may choose to establish the initial meeting dates while allowing the incoming Board an opportunity to review the remainder of the calendar.

I.4. Thunder Online Academy Discussion – Thunder Online Academy is approaching its current enrollment capacity of 40 students, creating several decisions regarding future growth. Administration will update the Board on current enrollment and discuss potential options, including maintaining the existing enrollment cap and waiting list, creating opportunities for existing teachers to provide online instruction for additional compensation, or identifying conditions under which an additional online teaching position might be considered. The purpose of the discussion is to receive Board direction regarding how the district should manage continued demand while maintaining the quality and sustainability of the program.
