District Administration
School Board Report
October 2026

District Calendar Survey

I will be asking for any input from the Board on a school calendar family survey at our October meeting. My plan is to share this with families early in November via Google forms and to bring results to our Board at the December school board meeting. At latest, I would recommend that we approve the 2026-27 calendar by our February board meeting.

Association for Equity in Funding (AEF) Update

We had another AEF Steering Committee meeting on October 12 and continue to make some great progress on proposed changes to our current public school funding formula. We remain optimistic that there is enough traction at the state level to make some changes within the next biennial budget that will better level the playing field across the state in terms of public school funding.

Qmlativ Software Transition

We continue to make progress on our transition from Skyward to Qmlativ. Some of the data migration has begun and we have been working on finalizing a training plan for our student information side of this transition. The current plan is to be up and running with Qmlativ for our SIS beginning with the 2027-28 school year, but we will not be transitioning our business software until the following year.

Baseball / Softball Field Bleachers

I contacted our rep at Beacon Athletics once again regarding additional bleacher sections for the baseball/softball field. These would be very similar to some of the portable bleachers currently at the field. A 25' five row portable unit with five rows would seat approximately 75 people. One section is approximately $12,500. He said that he can give us better pricing in December and he will be reaching out to me at that time with updated pricing.

Calendar Items

October 8	Skyward transition meeting
October 9	CESA11 PAC meeting
October 12	AEF Steering Committee meeting
October 22	Skyward transition meeting
October 27	CESA11 Curriculum Coordinators meeting
November 6	NW Cooperative Health Insurance Quarterly meeting @ CESA10
