

Superintendent Board Report

October 2026

- Our school nurses partnered with Walgreens to host a flu shot clinic for both staff and local community members this month. The event provided convenient on-site vaccinations to help protect everyone as flu season approaches.
- Parent-Teacher Conferences took place on October 15 and October 21, with strong family turnout. Teachers were available in the evenings on both dates to discuss student progress. Parents who couldn't attend can still contact their child's teachers to schedule an appointment. These discussions provided a valuable opportunity to collaborate on supporting student growth and learning goals.
- The Dupo Fire Department, led by Monte Miller, visited Bluffview on October 14, 2026, to observe Fire Prevention Month. Students always look forward to the visit with the Dupo Fire Department, and they enjoyed seeing the fire truck. Both buildings have been practicing their required drills.
- This month, we completed phase three of the Dupo High School branding project, adding new screens to the entry doors and front circle doors, and adding the mascot to the high school cafeteria. This school branding plays a vital role in unifying the learning environment by fostering school spirit, pride, and a strong sense of belonging among students and staff.
- Bluffview Elementary School has officially earned its first-quarter PBIS (Positive Behavioral Interventions and Supports) goal through its students' hard work and positive choices. The school will host a celebratory Monster Mash event on October 30, 2026. This festive celebration gives students a fun, engaging opportunity to enjoy the rewards of their good behavior while building positive relationships with peers and staff. It serves as a great incentive as everyone continues to focus on maintaining a safe, respectful, and productive learning environment for the rest of the school year.
