Re: Elementary October Board Report
Date:10/26/2026

Q Comp Data Dive Update:

- Vandyke had 19 staff attend. It was a great meeting. Staff are dedicated to moving the needle in a positive direction. I presented longitudinal literacy data. From there, grade levels dove into their grade level data and created an action plan for growth.
    - Kindergarten: Focus on building accuracy with letter sounds (3 part drill OG daily)
    - 1st: Increase decoding daily focus (additional decodable reader, 3 part drill)
    - 2nd: Not present at the meeting
    - 3rd: Focus on stressing the syllables in Morphology to help with decoding, silent e, and “tion” spelling patterns.
    - 4th: Focus on building and improving reading fluency in all students (Our students will participate in an intervention where they track and build their reading fluency with repeated reading with a partner. Students will be progress monitored in Fastbridge to track reading fluency progress)
    - Student Support: Connect high risk students to appropriate interventions to increase social emotional skills for classroom success (using SAEBRS data).
- We will revisit these goals and determine progress in December. The next meeting will have a focus of vertical alignment (what do students need to know for the next grade, etc.)

Literacy Lead:

- Sally has been meeting with grade level teams to align assessments to the standards. She will be continuing this work throughout the winter months. She is also meeting with Marble staff to help promote early literacy work to help with the transition into kindergarten.

November:

- Conference sign ups are going out on Parent Square this week. We are also holding the Book Fair during conference week.
- Christmas music is filling our halls. Our concert is early this year (December 3rd) and Ms. Ellies and crew are already working so hard on their show. We will have two shows again this year (9:30 and 12:45).
