DPI releases 2026-27 general school aids

Nearly two-thirds of Wisconsin school districts will receive reduced state aid for 2026-27 due to flat funding of $5.58 billion, maintained since 2017-18. The Wisconsin Department of Public Instruction released certified aid figures, revealing that 261 out of 421 districts will receive less aid than the previous year. The equalization aid formula, which considers expenditures, property values, and student counts, primarily dictates aid distribution.
