I am honored to nominate our Nutrition Services staff for the E+ Team Award. Our team includes Marie Kennedy, Aimee Lippold, Kotie Chandler, Nova Lott, and Rose Ricks. Their impact on our school goes far beyond serving meals—they help create an environment where students feel known, valued, and cared for.

Each day, our Nutrition Services team greets students with a smile and creates a welcoming, well-run lunchroom. They know our students by name and understand their individual needs, backgrounds, and circumstances. They are quick to notice when a child is having a difficult day and are willing to step in, offer support, and ensure that each student's specific needs are met.

What makes this team exceptional is their genuine investment in our students and our community. They know our families, understand our school, and consistently go above and beyond to support students and teachers. Whether accommodating a special need, helping a student through a difficult moment, or simply offering a kind smile, they make a meaningful difference every day.

Our students know they can count on Marie and her team. They feel safe, welcomed, and loved when they enter the lunchroom. This team does far more than serve meals—they serve our students, strengthen our school community, and help ensure every child has what they need to be successful.

For these reasons, I wholeheartedly recommend our Nutrition Services team for the E+ Team Award.
