BOARD POLICY

IFB

INSTRUCTIONAL PROGRAM **NOVEMBER 16, 2026**
STUDENT INTERNET SAFETY POLICY

In compliance with federal and state regulations, the district uses technology filters on all district devices or via district access. These measures block access to obscenity, pornography, and other content harmful to minors across the internet, email, and direct messaging.

Pursuant to Board Policy IFA and Administrative Procedures IFA(1), before being permitted access to the Internet, students will be instructed in the appropriate and ethical use of the Internet. Students and parents will sign authorization forms (LivNet) informing these individuals of the appropriate use and the consequences of policy violations.

School staff will provide instruction on appropriate online behavior including interacting with artificial intelligence (AI), social networking websites, chat rooms, and cyberbullying awareness. School staff provide reasonable supervision of students' use of the Internet. To the extent practical, steps will be taken to promote safety and security by preventing unauthorized access, other unlawful activities and unauthorized disclosure, use, or dissemination of minors' personally identifiable information.
