Board Meeting Date: 11.9.26

Title: Board Feedback Summary and December Bond Proposal

Type: Discussion

Presenter(s): Dr. Daniel Bittman, Superintendent

Description: Over the past several months, the School Board has engaged in multiple public discussions regarding potential long-term safety, security, and facility investments. These discussions have occurred during regular Board meetings, work sessions, and have included presentations related to district needs, facility planning, enrollment trends, safety and security priorities, technology infrastructure, and capital funding options.

Throughout these discussions, Board members have had opportunities to ask questions, provide feedback, and identify priorities for a potential future referendum. Based on the direction and feedback received from a majority of the Board during these public meetings, the administration intends to bring forward a recommendation for Board consideration at the December meeting.

The recommendation is expected to include information about a proposed bond question and capital project levy to support investments in school safety and security, facility improvements and additions, technology infrastructure, cybersecurity, future land acquisition, and other capital needs across the district. The proposed package will reflect the priorities previously discussed by the Board and will incorporate financing assumptions and tax impact information developed in consultation with the district's financial and legal advisors.

The purpose of this agenda item is to inform the Board of the administration's intent and preparation for December consideration.

Recommendation: No formal action is requested at this time.

Desired Outcome(s) from the Board: The Board confirms that the proposed scope and timeline remain aligned with Board direction prior to bringing a recommendation forward for consideration in December.
