BOARD POLICY

JGFF

DECEMBER 14, 2026
~~MARCH 19, 2018~~

STUDENTS
DRIVING, ~~AND~~ PARKING, AND MOTORIZED PERSONAL TRANSPORTATION DEVICES

Student driving and parking at any school parking lot is a privilege and responsibility. Automobiles and similar ~~V~~vehicles must be properly registered and insured with the State and drivers must possess a State of Michigan license. While prudent efforts will be made to maximize student parking on campus, not every student driver is entitled to park their vehicle in a school lot. If student is given such privileges, parking fees may be assessed by the school administration.

Students may use motorized personal transportation devices, including e-bikes, electric motorcycles, and similar devices, to travel to and from school as permitted by law. Students must comply with all applicable laws and safety regulations when operating such devices. Upon entering school property, students shall dismount and walk their devices to designated parking or storage areas. Operation of motorized personal transportation devices is prohibited in pedestrian areas, on sidewalks, playgrounds, athletic facilities, courtyards and other areas designated by the District.

The school administration shall develop rules and regulations promoting safe driving and building-level registration for parking privileges. Student vehicles and motorized personal transportation devices are subject to search by school or law enforcement officials and students in violation of school rules may have their parking privileges permanently revoked. ~~Parking fees may be assessed by the school administration.~~

The Superintendent or designee may establish administrative procedures, restrictions or prohibition of specific devices. The superintendent or designee may impose disciplinary consequences for violations of this policy, including referral to law enforcement when appropriate.
