2027-2028 CMS Course Catalog Change Document

Course Removals	
Course (or Area)	*Justification*

Updates/Modifications	
Course (or Area)	*Justification*
Updated Superintendent letter and school board members	To align with current administration
Updated course names, course codes, and prerequisites	TEA Curriculum update released Aug. 2026
Principles of Applied Engineering: Robotics (Course ID: 13036200)	Changed Robotics (grade 8, local credit) course from a local middle school elective to a high school CTE credit course that will count for a Level 1 CTE course. Mrs. Samantha Luarca was CTE certified in the summer of 2026 and has attended several professional development opportunities that align with Robotics course TEKS and instruction.
Technology Applications (Grade 6)	Changed Digital Literacy (Grade 6) to Technology Applications (Grade 6) The course TEKS and title change is more appropriate and accurate to the name of the course. Aligning the course name with the established TEKS would provide greater clarity regarding the curriculum, ensure consistency in course identification, and help communicate the intended instructional focus to everyone involved.
