

Site Report - Levelock - January, 2022

<p>To: Superintendent Kasie Luke And LPSD School Board Members</p>	<p>From: Joe Ward, Principal & Secondary Teacher</p>
<p>Outstanding Activities and Events</p> <p>The past few weeks have been packed with learning new material in the elementary class! Some subjects we've covered throughout our different math levels include multiplication and division, adding/subtraction with borrowing/regrouping, and shapes. In reading we continue working on letter and sound recognition, rhyming words, fluency, as well as daily writing. In social studies we made maps of Levelock, along with a map of Alaska. We've done a few science experiments as well, focusing on asking questions and making observations.</p> <p>The secondary class learned about the manner in which yeast works to cause bread to rise. They then made rye bread using a bread mix and bread machine. They shared their loaf of bread with the elementary class.</p> <p>The secondary class also made butternut squash pies practicing using fractions to measure out ingredients. The pies were served to all students and staff.</p>	
<p>Personnel</p> <p>Classroom aide, Jessica DiTondo, was hired to work as our tutor for the spring semester. This changes enables Ms. DiTondo work more hours assisting students individually and in small groups.</p>	
<p>Standards Based System</p> <p>Two students completed a level of math in January. They are on pace to pass another math level this semester.</p>	
<p>LSAC Activity</p> <p>The Levelock LSAC is scheduled to meet on Feb 15, 2022 . They plan to discuss: Making up the 2 days when school was closed in January, The intent to enroll process,</p>	

The Subsistence Calendar - How can the school continue with the subsistence calendar if our test scores do not improve? 1 challenge we face is that some students miss many days because their families travel when school is in session.

Pupil Attendance

3 K12 students and 1 preschooler returned to Levelock in January. This brings our enrollment back up to 11 K12 students and 3 preschoolers.
