2026 Resolutions Committee Report
Delegate Assembly - Saturday, November 21, 2026

This year, five resolutions were submitted for consideration. The committee recommends adopting three and not adopting two. Below is a brief summary:

Resolutions Recommended for Adoption:

1. **Tier II Pension Reform:** Supports legislative changes to improve retirement benefits for Tier II employees, including adjustments to pension increases, salary calculations, and retirement age. The goal is to improve recruitment and retention while addressing potential federal compliance concerns.
2. **Local Tax Collection and Distribution:** Seeks legislation requiring counties to reimburse school districts for financial losses resulting from delayed property tax collections or distributions, with a standardized process for recovering those funds.
3. **FOIA Safeguards:** Proposes additional protections against excessive, repetitive, or abusive FOIA requests while maintaining public transparency. The changes would help districts manage administrative costs and staff time associated with these requests.

Resolutions Not Recommended for Adoption:

4. **School Board Election Signatures:** Proposes reducing the required number of signatures for school board candidates from 50 to 25 (or from 10% to 5% of voters, whichever is less). The committee believes the current requirements are reasonable.
5. **School Meals and Fee Waiver Eligibility:** Proposes expanding districts' authority to verify eligibility and investigate potential fraud. The committee determined that existing state and federal safeguards are sufficient and expressed concerns about creating additional barriers for families.

These resolutions do not change existing laws but, if adopted, will guide IASB's legislative advocacy efforts. Pages 7–12 of the Committee Report outline the proposals in greater detail.
