Re: Celebrating Success - Sprague Little People, BIG Learning

---

It has been a privilege to join the Sprague community and be part of the meaningful experiences and opportunities that make each day so special for our students. At Sprague, we nurture curious, compassionate learners by creating meaningful opportunities for children to explore, question, understand, and appreciate the world around them while developing understanding of themselves and others. In other words, "Little people, BIG learning." I would like to highlight several things, including our EC program, The Nora Project curriculum in the library for our kindergarten students, and our Inquiry-Based Learning experiences through our "Wonder Windows" as just a snapshot of how we foster a love of learning here at school.
