ALEDO ISD BOARD MEETING TEMPLATE

MEETING DATE: November 16, 2026

AGENDA ITEM: District Voice Over IP Gateway Infrastructure Replacement

PRESENTER: Brooks Moore, Chief Technology Officer

BACKGROUND INFORMATION:

- Aledo ISD utilizes voice gateways throughout the District to support its telephone communications infrastructure. These devices are an important component of the District's phone system, providing connectivity to telephone circuits and supporting continued phone operations during certain network disruptions.
- The District's existing voice gateways have reached the end of their supported lifecycle and require replacement to maintain reliability, security, and manufacturer support. The proposed purchase includes replacing 17 existing voice gateways at campuses and District facilities.
- The purchase also includes professional installation and configuration services provided by Netsync Network Solutions. These services include equipment preparation, installation, integration with the District's existing telephone system, testing, and validation to ensure the new equipment operates as intended.
- This replacement is part of the District's ongoing technology infrastructure lifecycle plan and will help ensure reliable telephone communications across District facilities.
- This project would include equipment, five years of hardware support, and professional installation services.
- Administration will be presenting this as an action item at the December 14, 2026 Regular Board Meeting.

FISCAL INFORMATION:
The estimated cost would be approximately $80,000 and would be paid using 2023 bond funds.

ATTACHMENTS:
None- to be providing prior to the December 14, 2026 Regular Board meeting

ADMINISTRATIVE RECOMMENDATION:
None - Information only.
