November 2026 Technology Report

As we approach the end of the 1st semester of the 2026-2027 school year, here are some of the things that have been going on with technology at Illini Central.

1. Again this November, The Class was able to put together a video for the Veterans Day assembly. The students helped by doing the voiceover for a video that I created. We were happy with the result and the opportunity to thank our local Veterans for their service.

2. I have been working on a better way to inventory the Chromebooks the district has in service. With the number of devices we have plus the amount of repairs that are needed during the school year, this is a task that seems to be an issue at times. I am working to find a better solution to this problem.

3. Another successful project for The Class on the technology front for the district was the completion of a project for Mr. Nelson, one of our new 5th grade teachers. Mr. Nelson had his students give individual reports on Rosa Parks. The Class recorded the students giving their speeches and Senior Maddie Lowers was able to take that green screen footage and create a video compilation for Mr. Nelson & his students.
