Q Comp Goals & Rationales 2026-2027
Delano Public Schools

Elementary School

The percentage of all students in second and third grade at Delano Elementary School who are in the "low risk" or "college pathway" categories on the FAST aMath standardized assessment will increase from 79.4% in Spring 2026 to 79.9% in Spring 2027.

Goal Rational:

The Elementary School has selected a math goal this year. Historically our math testing data has been very inconsistent. During the past two years, we have seen an increase in our test scores for math. We would like to see this growth continue. This year, our staff is in our first year using the Reveal curriculum. We received our manuals on the first day of teacher workshop in the middle of our one-day math training. Having a math goal will give our staff time to focus on the new state standards being implemented and give the opportunity to dive deeper into the new math curriculum.

Intermediate School

The percentage of all students in grades four through six at Delano Intermediate School who are in the "low risk" or "college pathway" categories on the FAST aMath standardized assessment will increase from 83.1% in Spring 2026 to 83.6% in Spring 2027.

Rationale: ***Delano Intermediate School's site goal for the 2026–2027 school year will focus on improving student achievement in mathematics. This goal was chosen due to a decline in our FAST aMath test scores and the implementation of a new math curriculum. During the 2025–2026 school year, our goal was to increase student math proficiency from 86.1% in Spring 2025 to 86.6% in Spring 2026. Since we did not meet this goal, we will focus on instructional practices, strengthen our implementation of the new curriculum, and identify strategies to support student learning.***

High School

The percentage of current 7-10th graders at Delano High School who are in the "low risk" or "college pathway" categories on the FAST aReading standardized assessment will increase from 83.7% in Spring 2026 to 84.2% in Spring 2027.

Rationale: ***Delano High School's site goal for the 2026–2027 school year will focus on improving student achievement in reading. This goal was chosen due to a decline in our FAST aReading test scores. Due to the new curriculum and standards in math, we felt this was the correct choice to give our math teachers time to become familiar with the updates. Additionally, the reading scores are lower than the math scores further validating the reason behind needing growth in reading across grade levels.***

District

The percentage of all students grades 2-10 at Delano Public Schools who are in the "low risk" or "college pathway" categories on the FAST aReading standardized assessment will increase from 81.4% in Spring 2026 to 81.9% in Spring 2027.

Rationale*: The district goal for the 2026–2027 school year will focus on improving student achievement in reading. This goal was chosen due to a decrease in district FAST aReading test scores last year. The percentage of students reading at "low risk" or "college pathway" for aReading was 82.1% in 2025. That number fell to 81.4% in the spring of 2026. In order to increase overall district reading proficiency, we will focus on analysis of assessment data, targeted interventions, and strengthened core reading instruction.*
