Celebrating our nursing team

Reviewing records and reaching families personally.
Helping families locate documentation and vaccine appointments.
Following through so students can return to school.

Thank you to our nurses for the care and persistence
behind every record resolved and every family supported.

Our team’s follow-through is making a difference

Students with outstanding immunization requirements

0.53%

of district enrollment remained excluded

55 of 10,300 students
As of Nov. 17 at 4 p.m.

Staff continue working directly with each family to resolve requirements.

Thoughtful preparation with trusted partners

No reported measles cases in Benton, Stearns or Sherburne counties as of November 17

Our nurses and district teams are coordinating with county public health and using Minnesota Department of Health and CDC guidance.

Families and staff have received information and vaccination resources. Local healthcare partners have expanded vaccine access.

This ongoing coordination supports prevention and readiness.

Stronger systems support school attendance

824

new students enrolled so far this school year

82 enrolled in October and November.
New vaccine requirements at grades 7 and 12.

Earlier documentation

Updating enrollment procedures so paperwork is in place before students begin attending.

Continued nursing follow-up

Monitoring catch-up schedules and working with families to address outstanding requirements.

We follow Board policy and state law, including statutory exemptions.

DISTRICT 742

2026 Employer of Choice Award

Greater St. Cloud (GSC)
Our regional economic development organization

Recognizing employee development, recruitment, retention and a positive workplace culture.

This recognition belongs to the people across our schools and departments.
