

EDUCATIONAL OUTCOME GOALS AND EXPECTATIONS

The philosophy of the School District of Tomahawk is to facilitate the development in each child, commensurate with his or her ability, the potential for life-long learning, leading to career, academic, social, or personal success. In that end our schools will strive to be all inclusive and welcoming to diversity, realizing our students come from different family structures, ethnicity, religious faith systems and beliefs, genders or gender identification or orientation, social and national heritages, and will offer a variety of course offerings and educational opportunities, including education in basic skills, and advanced educational and skills development, social and civic development, and extra-curricular and social opportunities to meet their needs as they transition into a global society.
