304-03-06	GHS	Williamsburg	304-08-07	FES	S.Mill Ck Rd @ bridge
304-03-07	St Peter	South @ S.Hampton			
304-03-08	St Peter	State St.			
304-03-09	St Peter	South-W- S.Hampton			
304-03-10	HES	Peck Road			

1, Procedure for annual approval.

Confirm those previous hazardous bus route approvals by Resolution to Continue as Serious Safety Hazardous Busing.

2. Petition for new areas.

To qualify for hazardous busing for areas less than 1 ½ miles from home to school, the student must face (by regulation) at least one of four possible hazards. The hazards are:

TYPE I: Walking along a Roadway

Grade of Student

Location of walkway in relation to road

Speed of traffic

Volume of traffic

Length of hazard

TYPE II: Walking on a Roadway

Grade of student

Reason for walking on a roadway

Speed and volume of traffic

Length of hazard

TYPE III: Crossing a Roadway

Grade of student

Intersection control

Speed and volume of traffic

Width of roadway

Type IV: Crossing a Railroad Track

Grade of student

Crossing protection and number of tracks

Speed and number of trains

For any of the above four hazards to successfully apply to a Geneva area, a series of twelve (12) points must be accumulated for each hazard type. If the student faces more than one hazard in route to school, then application may be made for multiple hazards. In the case of the later, a series of twenty (20) points must be accumulated.

In addition to the points given in certain traffic environments, the school district board may add one or two judgment points for fractions particular to the hazard for each request. A narrative must accompany each request as well as a traffic map.

Recommendation

I would recommend the approval of the above resolution to continue hazardous busing in those areas previously approved.
