

2021 Transportation Report: Condition of Fleet

Background: The table below shows current miles on our fleet vehicles.

It is fiscally prudent to purchase vehicles on a rotational basis to avoid having to replace several vehicles out of the budget in a single year. As you can see from the chart above, our bus fleet is in great shape with six buses with fewer than 80,000 miles. Our four-wheel vehicles are a little older on average with only three of them under 80,000 miles, but we need fewer of these.

At this time, Transportation Director Jon Swenson is not recommending any vehicle purchases.

Recommended Action:

I recommend the board move to accept this report from the Transportation Director.
