

Action Sheet

MEETING DATE:

May 20, 2026

AGENDA ITEM:

Discuss and consider purchasing IXL Math Supplemental software for grades K-8 for two years using TKP Afterschool funds for an amount not to exceed \$115,000.

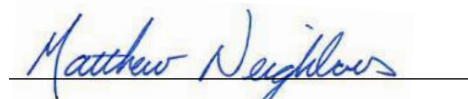

IXL Learning Math software content is a Kindergarten through grade 8 visual instructional program that helps students gain fluency and confidence in math. IXL helps students master essential skills at their own pace through fun and interactive questions, built in support, and motivating awards. This software has been used by the school district both during school day and after school for instruction and tutoring sessions with small and large groups for the past two years and has been requested for renewal due to its success with students.

The IXL Learning platform has been adopted by the state as an approved Math supplemental through the new IMRA process and was selected by House Bill 1416 as one of the three math softwares allowed to be used to waive the required small group instruction ratio for grades 4 through 8.

As previously stated, the Math Supplemental package provided by IXL Learning is an SBOE-approved instructional material that successfully completed the IMRA process. This is a state-approved product for the grade levels and instructional materials being purchased.

RECOMMENDATION:

I move that the Board of Trustees approve the purchase of IXL Math Supplemental software for grades K-8 for two years using TKP Afterschool funds for an amount not to exceed \$115,000.
