Course Title	Content Area	Grade Level:	Credit (if applicable)
Personal Finance & Investment	CTE-Business	10-12	0.5

Course Description

This course provides students with the essential knowledge and skills to manage their personal finances and make informed financial decisions. Through real-world applications, interactive projects, and hands-on activities, students will learn about behavioral economics, budgeting, banking, credit, paychecks and taxes, introductory investing, and retirement planning.

By the end of the course, students will develop responsible financial habits. This class empowers students with the confidence to make smart financial choices, setting them up for lifelong financial success! Students who want to continue their financial education should enroll in Advanced Personal Finance upon the successful completion of this course.

Aligned Core Resources	Connection to the <u>BPS Vision of the Graduate</u>

obstacles to saving, including automated savings p	plans, employer matches, and avoiding personal triggers.
Essential Question(s)	Enduring Understanding(s)
 Why is understanding personal finance essential for achieving personal and lifelong goals? How do personal and societal values shape the financial choices people make? 	 Financial literacy empowers individuals to make informed decisions, manage resources effectively, and build a foundation for financial stability and independence. Financial decisions are influenced by individual beliefs, cultural norms, and social expectations, which together shape how people prioritize spending, saving, and investing.
Demonstration of Learning	Pacing for Unit
 Students will use their understanding of needs, wants, and values to determine their impact of spending habits Students will create SMART financial goals 	3 classes of instruction
Family Overview (link below)	Integration of Technology
Personal Finance Family Overview	N/A

Engagement

• Use real-life scenarios and financial literacy games to motivate engagement.

- Offer choices in topics or projects to foster ownership.
- Connect finance concepts to students' personal goals and interests.

Representation

- Provide visual aids, infographics, and videos explaining financial terms and concepts.
- Use bilingual glossaries and simplified language for complex ideas.
- Incorporate multimedia materials to cater to different learning styles.

Action and Expression

- Allow students to demonstrate understanding through role-plays, posters, or digital presentations.
- Use graphic organizers to structure explanations of financial concepts.
- Provide opportunities for students to create personal budgets or financial plans digitally or on paper.

FIOVIU	• Frovide opportunities for students to create personal budgets of financial plans digitally of our paper.

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Earning Income - 12.1 Compensation for a job or career can be in the form of wages, salaries, commissions, tips, or bonuses, and may also include contributions to employee benefits, such as health insurance, retirement savings plans, and education reimbursement programs

Earning Income - 12.4 Employers generally pay higher wages or salaries to more educated, skilled, and productive workers than to less educated, skilled, and productive workers

workers than to less educated, skilled, and productive workers				
Essential Question(s)	Enduring Understanding(s)			
 What types of skills are necessary for career success, and how do they influence employability? How do education and experience impact the wages and salaries people earn? Why do employers offer benefit packages, and how do these benefits influence employee recruitment and retention? 	 Successful careers require a combination of technical, academic, and soft skills that enable individuals to perfor job tasks effectively and adapt to a changing workforce. Higher levels of education and greater work experience often lead to increased earning potential because they enhance an individual's value and qualifications in the job market. Employers use benefit packages which may include heal insurance, retirement plans, and paid time off to attract, motivate, and retain qualified employees while supportin their overall well-being.

Unit 3: Earning & Reporting Income

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Earning Income 12.6 Federal, state, and local taxes fund government-provided goods, services, and transfer payments to individuals. The major types of taxes are income taxes, payroll taxes, property taxes, and sales taxes.

Earning Income 12.7 The type and amount of taxes people pay depend on their sources of income, amount of income, and amount and type of spending.

Earning Income 12.8 Interest, dividends, and capital appreciation (gains) are examples of unearned income derived from financial investments. Capital gains are subject to different tax rates than earned income.

Earning Income 12.9 Tax deductions and credits reduce income tax liability.

Earning Income 12.9 Tax deductions and credits reduce income tax liability.					
Essential Question(s)	Enduring Understanding(s)				
 How does understanding my paycheck and taxes help me see where my money goes and how it supports society? Why is it important to understand employment paperwork and the steps in the tax cycle? What do teens need to know about earning income and paying taxes responsibly? How does learning to file taxes build financial independence and responsibility? How does understanding taxes prepare me for real-world financial success? 	 Knowing how net pay is calculated and where tax dollars are spent helps individuals make informed financial decisions and recognize their role in supporting public services and infrastructure. Understanding job forms and the tax cycle ensures accurate reporting, compliance with tax laws, and smoother financial management throughout the year. Teens who learn how to manage taxes early develop responsible money habits and gain confidence in handling real-world financial responsibilities. Filing taxes correctly helps individuals meet legal obligations, understand their income, and take advantage of potential tax benefits or refunds. Mastery of tax concepts equips individuals with the knowledge and skills to manage income effectively, make informed financial decisions, and contribute responsibly to society.

Lesson Sequence	Learning Target	Success Criteria	Assessment
1	Learning Target 1 I can explain how my net pay is calculated and identify where government spends my tax dollars.	 I can read and understand a pay stub I can compare mandatory and discretionary government spending I can explain the difference between gross and net pay I can analyze the different categories of discretionary government spending 	 Students will compare and analyze tax forms Students will examine dependent and standard deduction Students will analyze pay stub and payroll deductions
2	Learning Target 2 I can identify job paperwork and the tax cycle.	 I can identify important dates within the tax cycle I can compare tax forms and their purpose. 	
3	Learning Target 3 I can explain how teens navigate taxes.	 I can explain who qualifies to be claimed as a dependent for tax purposes. I can determine who is required to file income taxes. 	
4	Learning Target 4 I can demonstrate understanding of filing taxes.	 I can analyze a W-2 form. I can explain the difference between earned and unearned income. I can explain how to file my taxes. 	
5	Learning Target 5 I can demonstrate mastery of the taxes unit.	I can explain the purpose of income taxes, tax documents, and the forms necessary to complete a tax return.	

Unit 4: Budgeting

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Spending - 12.1 A budget helps people achieve their financial goals by allocating income to necessary and desired spending, saving, and philanthropy.

Spending - 12.2 Consumer decisions are influenced by the price of products or services, the price of alternatives, the consumer's budget and preferences, and potential impact on the environment, society, and economy

Spending - 12.6 Housing decisions depend on individual preferences, circumstances, and costs, and can impact.

	Let in the costs, and costs, and carrimpact.
Essential Question(s)	Enduring Understanding(s)
 How does creating and following a budget support effective financial planning? How can balancing needs, wants, and savings in a budget help people reach their financial goals? How do personal values and lifestyle choices influence housing decisions? How do changing prices and spending habits affect a person's budget and financial stability? 	 A budget serves as a financial roadmap that helps individuals manage income and expenses, make intentional choices, and work toward financial stability and goals. Allocating income thoughtfully among expenses, discretionary spending, and savings enables individuals to meet immediate needs while planning for future financial success. Housing choices reflect an individual's personal preferences, financial priorities, and lifestyle needs, balancing affordability with comfort and convenience. Understanding how prices influence spending decisions helps individuals adjust their budgets, maintain financial balance, and make informed purchasing choices.
Demonstration of Learning	Pacing for Unit
 Students will describe the difference in variable and fixed expenses. Students will describe the process of creating a budget based on available income and expenses. Students will analyze common budgeting strategies including pay yourself first, envelope system, zero based budgeting and 50/30/20 rule. Students will practice budgeting strategies 	 4 classes of instruction 1 class for assessment/performance-based task

Unit 5: Credit

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Managing Credit 12.1 Borrowers can compare the cost of credit using the Annual Percentage Rate (APR) and other terms in the loan or credit card contract.

Managing Credit 12.2 Loans that are secured by collateral have lower interest rates than unsecured loans because they are less risky to lenders.

Managing Credit 12.7 Lenders assess creditworthiness of potential borrowers by consulting credit reports compiled by credit bureaus.

Managing Credit 12.8 A credit score is a numeric rating that assesses a person's credit risk based on information in their credit report

Managing Credit 12.12 Consumer credit protection laws govern disclosure of credit terms, discrimination in borrowing, and debt collection practices.

Managing Credit 12.13 Alternative financial services, such as payday loans, check cashing services, pawnshops, and instant tax refunds, provide easy access to credit, often at relatively high cost.

retunds, provide easy access to credit, often at relatively	nigri cost.
Essential Question(s)	Enduring Understanding(s)
 How does using credit responsibly impact a person's financial future? How can using a credit card wisely help build and maintain good credit? What factors should be considered before taking out an installment loan? How can individuals protect themselves from identity theft and financial fraud? 	 Understanding how credit cards function and making on-time, low-balance payments strengthens credit history and promotes responsible financial behavior. Evaluating loan terms, interest rates, and repayment responsibilities helps borrowers make informed decisions and avoid unnecessary debt. Recognizing how identity theft occurs and practicing safe financial habits reduces the risk of fraud and financial loss.
Demonstration of Learning	Pacing for Unit
 Students will describe the basics of credit Students will evaluate the cost of credit (interest) Students will identify various forms of credit and the advantages and disadvantages of using them Students will describe the difference and importance of a credit score and a credit report Students will read a Schumer box Students will be able to assess creditworthiness Students will understand strategies to defend and deflect identity theft 	 6 classes of instruction 1 class for assessment / performance-based task

UDL Indicator and Teacher Actions

Engagement

- Use real-world bank account simulations and service comparisons.
- Offer choices of bank services to research and present.
- Connect banking concepts to students' financial goals.

Representation

- Present information through diagrams, videos, and interactive tutorials.
- Use bilingual resources explaining banking terminology.
- Incorporate visuals of bank statements, apps, and online platforms.

Action and Expression

- Encourage students to set up mock bank accounts digitally or on paper.
- Use role-playing to practice banking transactions.
- Allow students to create brochures or digital presentations explaining banking services.

Unit 7: Savings

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Saving - 12.1 Financial institutions offer several types of savings accounts, including regular savings, money market accounts, and certificates of deposit (CDs), that differ in minimum deposits, rates, and deposit insurance coverage.

Saving - 12.2 Deposit account interest rates and fees vary between financial institutions and depend on market conditions and competition.

Saving - 12.3 Unless offered by insured financial institutions, mobile payment accounts and cryptocurrency accounts are not federally insured and usually do not pay interest to depositors.

Saving - 12.4 Inflation can erode the value of savings if the interest rate earned on a savings account is less than the inflation rate.

imation rate.			
Essential Question(s)	Enduring Understanding(s)		
 How do different types of savings accounts help individuals meet their financial goals? How can comparing financial institutions help you choose the best place to save your money? How do modern financial tools like mobile payment accounts influence saving habits and long-term financial growth? How does inflation influence the real value of money saved over time? 	 Various savings accounts offer different benefits and purposes, allowing individuals to choose the best option for their financial needs. Evaluating interest rates, fees, accessibility, and services enables individuals to make informed choices that maximize savings growth and minimize unnecessary costs. Comparing traditional and digital financial accounts helps individuals understand how convenience, accessibility, and interest potential affect their ability to save consistently over time. Inflation decreases purchasing power, so understanding its relationship with interest rates helps individuals make saving choices that preserve and grow the value of their money.

Unit 8: Investing

Relevant Standards: Bold indicates priority

National Standards for Personal Financial Education

Investing 12.1 A person's investment risk tolerance depends on factors such as personality, financial resources, investment experiences, and life circumstances.

Investing 12.2 Investors earn investment returns from price changes and annual cash flows (such as interest, dividends or rent). The nominal annual rate of return is the annual total dollar benefit as a percentage of the beginning price.

Investing 12.3 Investors expect to earn higher rates of return when they invest in riskier assets.

Investing 12.6 When making diversification and asset allocation decisions, investors consider their risk tolerance, goals, and investing time horizon.

Investing 12.8 Tax rules affect the rate of return on different investments, and can vary by holding period, type of income, and type of account.

Investing 12.13 Investors often compare the performance of their investments against a benchmark, such as a diversified stock or bond index.

or bond maex.	or borid index.						
Essential Question(s)	Enduring Understanding(s)						
 achieving long-term financial goals? 2. How do stocks help individuals build wealth and achieve financial goals? 3. How do bonds contribute to a balanced and secure investment portfolio? 4. How do mutual funds make investing more accessible and diversified for individuals? 5. How do index funds help investors build wealth with lower costs and less risk? 	 Investing allows individuals to grow their wealth over time, outpace inflation, and build financial security for future goals such as retirement, education, and major life expenses. Stocks represent ownership in a company and offer the potential for growth through capital gains and dividends, but they also carry varying levels of risk. Bonds are loans made to governments or corporations that provide fixed returns, offering stability and predictable income to balance the risks of other investments. Mutual funds pool money from many investors to purchase a variety of assets, providing diversification and professional management to help reduce individual risk. Index funds track the performance of a market index, offering broad diversification and lower fees, which make them an effective long-term investment strategy. 						
Demonstration of Learning	Pacing for Unit						
 Students will compare different investment products including stocks, bonds, mutual funds and index funds to evaluate their features, risks and returns. Students will determine ways to diversify an investment portfolio based on goals and risk tolerance. Students will research and present real stock market data. Students will identify major stock indexes and analyze the performance compared to other investments. Students will describe how mutual funds pool money to buy diversified investment portfolios managed by professionals. 	 5 classes of instruction 1 class for assessment/performance-based task

Opportunities for Interdisciplinary Connections

- Math: apply percent change, compound growth
- Economics: Connect inflation, risk, supply and demand and capital markets, investing decisions
- Technology: use online investment simulators, stock tracking apps.
- ELA: critical reading and writing through research on public companies
- Psychology: How emotions, cognitive biases influence decisions and market volatility.

Anticipated misconceptions

- Investing is only for rich people or adults.
- Saving and investing are the same thing.
- Investing is basically gambling.
- If a stock value drops, the investor loses all of their money.
- The safest investments are always the best
- Diversification just means buying lots of stocks.
- Bonds, mutual funds and index funds are all the same thing.
- Once I invest, I can't lose money.

Connections to Prior Units

Connections to Future Units

Unit 4 & 7: The Investing Unit connects to the Budgeting and Savings units.

A deep-dive is done regarding investing in the Advanced Personal Finance class.

Differentiation through Universal Design for Learning

UDL Indicator and Teacher Actions

Engagement

Vesting

- Use stories of real investors or success stories to inspire interest.
- Incorporate interactive simulations of investing in stocks, bonds, or mutual funds.
- Offer choices for students to explore different investment types through projects, such as creating a digital investment portfolio or presentation

Representation

- Present concepts through videos, infographics, and visual diagrams explaining stocks, bonds, mutual funds, and index funds.
- Provide bilingual glossaries and simplified explanations of investment terminology.
- Use visual aids like charts showing growth over time for different investment options.

Action and Expression

Supporting Multilingual/English Learners

- Enable students to demonstrate understanding by creating digital presentations, posters, or videos explaining various investment types and their roles.
- Use role-playing activities where students act as investors making decisions between stocks, bonds, and mutual funds.
- Allow students to simulate investing with classroom stock market games or budgeting tools to see how investments grow over time.
