Technology Integration Goal #2

2011-2012

District Key Result
Increase student learning and expand instructional strategies by implementing technology.

Technology Integration Goal Support data (evidence of need)	Technology Integration Goal Support data (evidence of need)
Increase the number of staff and students who utilize collaborative technologies that enhance existing curriculum or create new curriculum.	What are the gaps? • Staff do not know what technology should be used • Staff do not know what technology could be used • No vision • Preconceived notions of technology return on investment

Measures (what will be used to determine goal progress)	Targets (what we hope to see at the end of the process)
1. Collaborative technology logs	1. 50% increase in the number of students and staff accessing Google Docs and a 10% increase in Moodle and Wiki Pages
2. Staff and student survey	2. Survey will show an increase in the use of collaboration tools.

Strategies (what needs to be accomplished to achieve this goal)	Person(s) Responsible	Timeline
1. Promote use of collaborative technologies and provide training (e.g., Skype, blogs, wikis, podcasting, Moodle, Google Docs)	Principals, Directors of Technology and Teaching and Learning,, Technology Integration Specialists	September 2011-June 2012
2. Promote positive impact on tools on student learning	Technology Integration Specialists, Teachers	September 2011-June 2012
3. Administer a staff and student survey	Directors of Technology and Teaching and Learning	June 2012
