I think I am answering your questions. If not, please let me know.

- We will begin with 1 full-time virtual elementary teacher. Our desire is for our virtual program to grow. When that occurs, we will transition more teachers to virtual, but that will be determined by our student numbers.

Good evening! We have had a question arise from the State Board regarding your digital learning application. Please review the question and be ready to answer tomorrow during the Board meeting.

- a. How many teachers at the lower elementary? Will they be virtual only? The plan states "some teachers will be virtual, some dual, and some simultaneous". Could you be specific about where and when each type would occur?

Please let us know if you have any questions!
