RE: Requested Quote for UA Collections

Dear Ms. Guardipee-Hall

There are two options that our office feels would meet the needs of School District #9.

The first would be for the district to draft a Drug Testing Services Agreement with SafeTrac Solutions of Great Falls, Montana and have a number of employees certified to do collections for the UA's. This would cost the district \$30 per student and per employee and would be between SafeTrac Solutions and the district only.

The second option would be to utilize the Blackfeet TERO as a collection site along with the certified collectors in our office. The cost to the district would be \$45 per student and \$50 per employee per test. The amount is subject to change should the testing material and rates go up. The testing would be done at the Blackfeet TERO. Should the district wish for the Blackfeet TERO to test at the districts designated facility, there will be an added fee.

Whichever option the district should choose; it would have to draft a Drug Testing Service Agreement with SafeTrac Solutions.

Please feel free to contact the Blackfeet TERO with any and all questions that you and the district may have.

Respectfully,

A handwritten signature in black ink, appearing to read 'Teola J. Fish'.

Teola J. Fish
TERO Director
