

John Troy  
Assistant Superintendent & General Counsel

Board Report

March 14, 2025

1. **Artificial Intelligence** - This month Kathi Norman and I attended the WILCO IASBO professional development meeting. The presentation was on artificial intelligence and its application at schools. This was a very informative meeting and I can envision future uses of AI in the business office.
2. **Construction Bid Opening** - On Thursday, March 13th, the district held a bid opening for the upcoming construction projects. The bids were very competitive and came in well below of budgeted estimate. There is a resolution in the board documents approving and assigning the contractors to our Construction Manager, Nicholas.
3. **Bus Lease Bid** - In the Board's back up documents is the district's bus lease bid which has been published. The district is returning 10 buses but at this time only needs 6 buses to replace them. In anticipation of District 111 providing transportation services to District 201, all buses will be leased by District 111.
