Subject: Consider Approval of 2023 Bond Second-Sale Cyber Security Upgrades (Application Delivery Controllers) – Cooperative Contract(s) (SB07)

Background Information:

- Included in the 2023 Bond proposal, this recommendation is to enhance and modernize Lewisville ISD's cybersecurity infrastructure to protect critical systems, applications, and data resources that support instructional and business operations within the District's two data centers.
- The proposed solution is designed to support operational continuity, improve resiliency of critical services, and align with current cybersecurity best practices and infrastructure standards.
- This project includes implementing all required electronics, hardware, software, installation, configuration, licensing, support, maintenance, and related costs necessary for a complete turnkey, vendor-provided solution for the deployment of Datacenter Application Delivery Controller appliances at both district data center locations.
- If approved, this recommendation will provide the District access to a wide range of vendors, products, services, and pricing to help provide the best value to the District.
- Best value involves considering several factors, which may include, but are not limited to, price, quality, availability, delivery timing, support, and other relevant factors.

Administrative Consideration:

- Funds for these products and services will come from the 2023 Technology Bond budget.
- Contingency Allowance: 5%. The contingency is designated for unforeseen conditions or additional project requirements that are identified once construction begins. Approval by Lewisville ISD is required before work can be initiated.
- Anticipated expenditures, including a 5% contingency: \$1,078,774 but will not exceed the approved budget.
- This procurement complies with Section 44.031 of the Texas Education Code and other applicable state and local procurement laws.

Recommendations:

- That the Lewisville ISD Board of Trustees approves the use of Lewisville ISD-eligible cooperative contract(s) for the 2023 Bond Second-Sale Cyber Security Upgrades (Application Delivery Controllers), the associated awarded vendors, and the estimated expenditures effective upon approval.

Timeline/Report:

- Term: Upon approval
