Sec. 309. Table of Use Requirements.

Ponds	Public or private body of water under 1 acre in size. Can be natural or man-made.	None	A. The minimum size of a parcel on which an artificial pond is to be established shall be five (5) acres. B. An artificial pond shall be set back a minimum of fifty (50) feet from all lot lines. C. An artificial pond shall have a minimum depth of (6) feet over a minimum fifty percent (50%) of its maximum design surface area, and no portion of an artificial pond shall be less than two (2) feet deep except along its banks, which shall be at a minimum grade of 1:10 but no greater than 1:1. D. No artificial pond shall be created within fifty (50) feet of ecologically sensitive sites, including wetlands and streams, unless all applicable county, state and federal permits are obtained. E. No artificial pond shall cover more than twenty percent (20%) of the area of a lot. F. The planning commission may require screening around the pond, in the form of plant material or fencing, if it finds that such screening or transition strip, because of the pond's location and character in relation to surrounding land uses or circulation systems, is necessary to assure compatibility between land uses or otherwise protect the public health, safety, or welfare. A. The applicant shall demonstrate that the proposed design of the pond will not result in stagnation, odors, mosquito infestation, or other nuisance-causing conditions. <u>G.A. See Chapter 10 – ENVIRONMENT, ARTICLE V. POND OR LAKE EXCAVATION/CONSTRUCTION for pond regulations.</u>
