

MANAGEMENT

Resources that offer a wealth of information to improve workplace safety.

Safety Essentials Online

This online service provides resources to help improve safety and health compliance, best practices, policies and written programs. It includes:

- Customizable and downloadable training tools
- Explanations of applicable laws and regulations
- Daily regulatory updates
- Best practices case studies and whitepapers
- Daily safety news articles
- *Ask the Experts* Q&A database
- An online database of over 4 million SDSs
- Customizable newsletter templates
- A safety *Plan Builder* library

ANALYSIS

Methods to measure and analyze the effectiveness of your workers' compensation cost containment program.

Workers' Comp Kit®

This online self evaluation will help identify success of program components, provide cost comparisons and program improvement solutions through three major steps:

- **Program Evaluation** – to help determine how well your workers' compensation program aligns with industry best practices in terms of managing and controlling claims costs.
- **Cost Reduction** – with access to over 60 tools such as letters, presentations, forms and worksheets to assist in reducing the cost of claims after they've occurred.
- **Benchmarking** – the ability to compare your losses to your peers on a national level within one of 14 industry averages or on a state level.

MAP Client Services

PREVENTION

Tools to help prevent injuries before they occur, save lives and reduce organizational costs.

Safety Training Source

This self-paced, online employee learning management system provides courses that can be assigned to employees or entire departments, enabling you to track their progress and overall scores. Over 150 courses are included with select items available in Spanish.

S:ERVE

Safety: Emergency Responder Vehicle Education (S:ERVE) is an online driver simulation and curriculum created to educate law enforcement, firefighters, and EMS personnel to drive at

their safest in emergency response scenarios in an effort to reduce collision rates.

Remedy Interactive

This online tool promotes workplace wellness by helping employees work more comfortably at their computers and workstations with self-help ergonomic tools. It is designed to help decrease injury-related costs, drive down absenteeism and better address OSHA compliance.

Also Available Through MAP Client Services:

- Risk control services that include access to a network of safety experts and consultants.
- Vendor discounts available for a variety of safety management and training materials.
