1 **Criminal Background Check Requirement**

If an employee of a contractor is covered under SB 9, the contractor must bear the burden of obtaining a national, fingerprint-based criminal history check. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. The contractor, not the district, is responsible for contacting DPS directly to set up an account for the purposes of obtaining criminal history record information. Under the statute SB 9, a contractor is required to conduct a criminal history review on an employee only when the following criteria have been met: *The employer has contracted with district to provide services. *The particular employee will have continuing duties relating to the contract with the district. * The particular employee will have contact with students. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. The use of tobacco products are not allowed on school district property. ~~~This is your electronic signature.

Overview of 95 Percent Group's Products

Below is a list of products offered by 95 Percent Group. Please note that grade spans listed below represent general implementation guidance and can vary based on local circumstances and tiers of instruction.

More information can be found at www.95percentgroup.com.

95 Phonics Core Program® (95 PCP) (Grades K–5). This classroom-ready program supports meaningful and effective literacy progress linked across grades. 95 PCP is grounded in the science of reading and serves as the core phonics and word study strand of a structured literacy classroom. 95 PCP provides recommended instructional dialogue, including an embedded structured gradual release, teacher modeling followed by guided practice, and corrective feedback for students to support accuracy and automaticity. 95 PCP is aligned with evidence-based instructional practices in structured literacy, following the science of reading research base. Instruction is systematic, following a developmental progression from simple to complex; explicit, introducing new skills with direct, multisensory instruction and a gradual release of responsibility from teacher to students; and diagnostic, targeted to students' specific skill needs as determined by frequent assessment.

Tools 4 Reading Sound Walls Classroom Kit featuring Kid Lips (K–3). 95 PCP and Sound Walls work in concert to build phonics and phonemic awareness knowledge in students in grades K–2 (even up to grade 3 if students are behind). This kit provides everything a teacher needs to bring sound walls to life in a classroom—providing step-by-step guidance on how to teach the 44 phonemes.

95 Phonics Booster Bundle®: Tune-Up (1–4). This 25-day phonics program is taught to either a whole class or a small group and provides teachers with phonics and word study lessons to catch up students who have experienced gaps due to instructional challenges. This program's 20-minute lessons are designed to teach daily to “tune-up” the most critical phonics skills that students may not have mastered during the previous school year.

95 Teaching Blending® (1–3). This program can be used as a stand-alone Tier 2 intervention for grades 1 and 2 and as a supplement to core Tier 1 for universal instruction in kindergarten and grade 1. It is designed to work with students who are at benchmark on PSF (Phoneme Segmentation Fluency), but not at benchmark on NWF (Nonsense Word Fluency) and are not reading the whole word without having to subvocalize beforehand. Students are guided through transitioning from sound-to-sound decoding to reading whole words blended by developing blending skills across seven distinct stages.

95 Multisyllable Routine Cards™ (MSRC) (3–12). These classroom-ready multisyllable decoding lessons, visuals, and manipulatives help students make quick work of reading big words. Fun and easy-to-use routine cards help teachers provide direct, explicit instruction. The program is designed to engage students with lessons focused on recognizing patterns and vowel sounds and applying syllable division rules.

95 Vocabulary Surge™ (3–8). This solution is designed to address a pressing academic issue: Students whose vocabulary is limited are unable to comprehend complex text. This vocabulary program shines a light on word parts and helps students build powerful vocabulary skills, dramatically accelerating their reading fluency and word comprehension. Fifteen-minute daily

vocabulary lessons show students how to break words into parts, hypothesize the meaning of word parts, and check the meaning in context.

95 Phonological Awareness Screener for Intervention™ (PASI) (K–1). PASI is an easy-to-administer informal assessment designed to provide information about a student beyond what curriculum-based measures such as DIBELS® and AIMSweb® can provide. The PASI enables teachers to pinpoint deficits, determine where to start instruction, and how to group by skill deficits. Information from the PASI eliminates guessing and allows teachers to make informed decisions about applying Tier 2 and Tier 3 instruction. The PASI includes three Long Forms for progress monitoring. A student’s performance enables teachers to assess needs, place students in groups by their lowest skill, and go directly to that skill in the recommended instructional materials.

95 Phonics Screener for Intervention™ (PSI) (1–12). PSI is a brief and easy-to-administer diagnostic tool designed to pinpoint the specific decoding needs of students who have poor reading accuracy. It is used to determine where to begin each student’s intervention, to group students with similar needs, and to determine when to move students out of one skill and into another. Information from the PSI eliminates guessing and leads directly to the placement of students into Tier 2 or Tier 3 groups for focused intervention instruction. The PSI is a valuable tool to place students in appropriate skill groups.

95 Phonics Lesson Library™ (K–12). This collection of lessons includes all the essential components for effective phonics intervention instruction with each focusing on a different skill. 95 Phonics Lesson Library is used primarily for tiered, small-group instruction and provides a format that is delivered explicitly and systematically, addressing targeted skill deficits. This extensive phonics intervention program is available in three phonics skill levels: Basic, Advanced, and Multisyllable.

95 Phonics Chip Kit™ (K–12). The Phonics Chip Kit™ (PCK) helps teachers explain phonics patterns using manipulatives and sound-spelling mapping. Each kit helps teachers focus on sound-spelling pattern identification rather than word reading and directs students’ attention to identifying individual phonemes in words and analyzing sound-spelling patterns. Each kit provides strategies for identifying different sound-spelling patterns in words. Each kit has:

- Teacher Materials, including magnetic-colored blank sound chips, magnetic-colored spelling chips with letters and/or patterns printed on them, magnetic sound-spelling mapping mat(s), and a Teacher Guide with explicit instructions.
- Student Materials, including eight laminated sound-spelling mapping mats and eight sets of blank sound and spelling chips in laminated card stock.

95 Phonics Skill Series™ Short Vowels (1–2). The versatile program helps students, across all grade levels, proficiently read CVC words through 20-minute lessons that reinforce the closed syllable pattern through word sorting, sound-spelling mapping with and without phonics chips, fluency, word chains, sentence dictation, and decodable passages. Each scripted lesson begins with an explanation of the phonics concept and provides student application at the word, phrase, sentence, and passage level leading to mastery. The lessons are easy for teachers to implement regardless of their depth of knowledge about phonics concepts.

95 Phonics Booster Bundle®: Summer School (1–4). This 25-day summer school phonics program is taught to either whole class or small group to address gaps in foundational skills. It can

be taught either face-to-face or remotely. The program provides teachers with an all-inclusive summer school phonics and word study program to help students who have deficits catch up when they are behind due to unfinished learning or other circumstances. For overextended teachers who need to focus on spring instruction, this program takes care of all the planning. The Teacher's Package and Student Workbook Package provide everything needed including engaging individual student phonics manipulatives and decodable texts.

95 Comprehension (2–6). This set of materials is for teaching seven comprehension processes designed to maximize the efficiency of instruction for teachers and students. The lesson plans, texts, mats, and tokens provided with this kit allow teachers to explicitly model how good readers comprehend while reading text aloud and placing tokens on specific parts of the text where a comprehension process was used. After modeling with “think-alouds,” teachers then guide students to use these processes first with provided text and then during independent reading.

Spellography (4–8). The is spelling and word-study program for intermediate and upper grade students teaches spelling concepts explicitly, systematically, cumulatively, and enjoyably. With this structured language approach, students will learn:

- Phoneme awareness and syllable stress patterns (phonology)
- Sound-spelling associations (phoneme-grapheme correspondence)
- Syllable spelling patterns and combinations
- Prefix, root, and suffix constructions (morphology)
- Sentence structure (syntax)
- Parts of speech (nouns, verbs, adjectives, and adverbs)
- Idioms, figures of speech.

95 RAP™ (1–12). The technology-based, Tier 3 intervention solution is for students who are persistently struggling to learn to read, including those with dyslexia. 95 RAP (Reading Achievement Program) is an individualized, small group reading intervention designed for struggling readers who have been intervention resistant. Direct, explicit, mastery-based instruction supports progress in phonological awareness, phonics, fluency, vocabulary, and comprehension. The technology tracks mastered skills, pulling them to the front of instruction for teachers to review weekly and verify retention.

1 **Criminal Background Check Requirement**

If an employee of a contractor is covered under SB 9, the contractor must bear the burden of obtaining a national, fingerprint-based criminal history check. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. The contractor, not the district, is responsible for contacting DPS directly to set up an account for the purposes of obtaining criminal history record information. Under the statute SB 9, a contractor is required to conduct a criminal history review on an employee only when the following criteria have been met: *The employer has contracted with district to provide services. *The particular employee will have continuing duties relating to the contract with the district. * The particular employee will have contact with students. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. 1 **Criminal Background Check Requirement**

Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. A Proposer's violation of this section shall constitute substantial failure. 1 **Criminal Background Check Requirement**

If an employee of a contractor is covered under SB 9, the contractor must bear the burden of obtaining a national, fingerprint-based criminal history check. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. The contractor, not the district, is responsible for contacting DPS directly to set up an account for the purposes of obtaining criminal history record information. Under the statute SB 9, a contractor is required to conduct a criminal history review on an employee only when the following criteria have been met: *The employer has contracted with district to provide services. *The particular employee will have continuing duties relating to the contract with the district. * The particular employee will have contact with students. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. The use of tobacco products are not allowed on school district property. ~~~This is your electronic signature.

1 **Criminal Background Check Requirement**

If an employee of a contractor is covered under SB 9, the contractor must bear the burden of obtaining a national, fingerprint-based criminal history check. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. The contractor, not the district, is responsible for contacting DPS directly to set up an account for the purposes of obtaining criminal history record information. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. 1 **Criminal Background Check Requirement**

If an employee of a contractor is covered under SB 9, the contractor must bear the burden of obtaining a national, fingerprint-based criminal history check. Under Section 22.0834 of the Education Code, the contractor is then required to certify to the district that the criminal history check has been performed. The contractor, not the district, is responsible for contacting DPS directly to set up an account for the purposes of obtaining criminal history record information. Under the statute SB 9, a contractor is required to conduct a criminal history review on an employee only when the following criteria have been met: *The employer has contracted with district to provide services. *The particular employee will have continuing duties relating to the contract with the district. * The particular employee will have contact with students. A contractor or sub-contractor may not work on District property or any location the District deems a place where students are regularly present when *they have been convicted of a felony or misdemeanor involving moral turpitude, as defined by Texas law or any other offense the District believes might compromise the safety of student, staff or property.

A Proposer's violation of this section shall constitute substantial failure. If the Proposer is the person or owner or operator of the business entity, that individual may not self-certify regarding the criminal history record information and its review, and must submit original evidence acceptable to the district with this Agreement showing compliance. Possession of fire arms, alcohol and/or drugs, even in vehicles, is strictly prohibited on school/district property. The use of tobacco products are not allowed on school district property. ~~~This is your electronic signature.
