

## Kalamazoo RESA-Education for Employment Merit Curriculum Credit Proposal

Currently EFE has a substantial list of programs offered that are approved by Vicksburg Community Schools for academic credit (see attached). This information is shared with counselors, principals, high school students and parents of all 10<sup>th</sup> – 12<sup>th</sup> grade students.

For the 2011-12 school year, EFE is anticipating three edits/additions to this list:

1. Proposed new program Wind Energy Technology-4th related math credit (this will be an additional course that will be state approved under the current Electronic and Robotics Engineering program which has a 4<sup>th</sup> related math credit already approved).
2. Accounting, College – 4<sup>th</sup> related math credit (pilot course for AP Accounting, will be an additional state approved course under the pathway program: Accounting/ Finance which has a 4<sup>th</sup> related math credit already approved).
3. Computer Technology I – 4<sup>th</sup> related math credit (this course along with the Network Administrator course is filed with the state in the Computer Systems Network and Telecommunications program pathway. Network Administration is already approved for 4<sup>th</sup> related math credit).
