**Re: Authorizing the purchase of hardware/software to upgrade security cameras districtwide**

With the heightened awareness of safety and security on our campuses, the District received a proposal to upgrade the security cameras districtwide. This proposal includes replacing existing cameras and adding approximately 650 new cameras, video management software and licensing, installation of cameras, and necessary cabling for new cameras.

The total cost for the security camera project is \$1,243,467.00. This is bid under the Sourcewell, formerly National Joint Powers Alliance(NJPA), contract#: 031517-SIE.

**Recommendation:**

**The Coppell ISD Board of Trustees approve Siemens Industry, Inc and Superior Fiber & Data Services, Inc. to complete the security camera upgrade project for \$1,243,467.00.**
