**DESCRIPTION OF AGENDA ITEM:**

The Technology Department, in collaboration with the Facilities Department, is planning to purchase 300 ViewSonic 86" interactive displays that will replace projectors and outdated sound systems in every classroom and media center in the district. The displays will be installed in several phases with a contracting company, which has agreed to warehouse the displays until they are to be installed.

The cost per device is not to exceed \$3,000 (\$900,000 total)

The cost of installation is yet to be determined, but estimated at \$500 per room (\$145,000)

The installer can warehouse the displays for us, and because technology prices are increasing rapidly, we would like to make the purchase sooner than later, even though the plan to start mass installations is not happening until summer break.
