

April 2025

General Education Board Report

Kelly would like to extend her heartfelt thanks to the dedicated staff of the General Education Department for their continued commitment to serving our community, local districts, staff, and students. Their valuable work is truly unmatched. The expertise each of them brings to the field is impressive, and the strong relationships they prioritize and build are essential to our collective success.

As we enter the final months of the school year, our focus will be on evaluating the progress we've made and planning strategically for the year ahead. We continue to engage in meaningful conversations with local instructional leadership and are excited to already have a number of summer training opportunities scheduled on the calendar.
