

November 29th Technology Board Report

As the newly appointed Director of Technology, joining the team officially last week, I have embarked on a comprehensive review of our current technology infrastructure and practices. This immediate deep dive aims to identify opportunities to enhance efficiency, better meet our district's needs, and understand the full scope of our technology landscape. Our commitment is to ensure that our resources are aligned with our educational objectives and that our environment remains conducive to learning and growth.

Camera Replacement:

I met with School House to commence with Phase 3 of our camera replacement project. This phase involves the installation and integration of Verkata security cameras across our campus. I met with James who will be doing the actual installation and will continue working with principals to ensure their needs from this system are met

Knowledge Base:

We have initiated the creation of a comprehensive Knowledge Base. This dynamic, evolving platform is designed to empower our staff as well as stakeholders by providing a one-stop resource for all the technology tools at our disposal. The Knowledge Base will house information on how to use and troubleshoot various technologies, fostering a self-service culture and reducing the workload on our IT helpdesk. We believe that this initiative will significantly enhance our collective technological proficiency, by standardizing some of our systems as well as foster a more collaborative learning environment.

Reorganization:

Our department has undergone a strategic reorganization following a challenging period. We have taken this opportunity to reassess our roles, responsibilities, and processes to ensure we are optimally positioned to support the school's technology needs. This reorganization has involved a redistribution of tasks, streamlining of processes, and reinforcement of our team's commitment to service excellence. We are confident that these changes will bring about increased efficiency, improved service delivery, and a more resilient department.

In conclusion, we are excited about these developments and are committed to leveraging technology to enhance the learning experience at our schools. We appreciate the Board's continued support as we navigate these changes and look forward to sharing our progress in the coming months.
