RE: Eureka Math-Didax Order

As part of the K-5 Eureka Math program there are student and teacher resources that are unique to Eureka Math lessons. These resources are developed to support student understanding and coherence between grade levels. For example, Eureka Math lessons use specific tools such as Rekenreks, place value discs, and metric weight sets to illustrate concepts for students. Our K-5 math written curriculum teams, who began meeting in May, have outlined the tools and materials that are necessary to implement the program with fidelity. To support our full implementation of the Eureka Math program, District 97 wishes to purchase these resources for our K-5 classrooms for the 2016-2017 school year. The financial impact to the district is \$29,433.92.

Sincerely,

Dr. Carrie Kamm
