

February Maintenance Report

With winter season finishing up we will be getting ready for spring sports that are starting right around the corner! Spring sport practices start March 3rd. Grounds will be doing some baseball site improvements which include a new pitching mound. Maintenance will begin to do seasonal inspections on roofs, playgrounds, and exterior inspections of our facilities. Over winter we did not experience any major HVAC repairs, which is a big difference to last year, were we experienced a handful of units going out. I believe this success is because of our increase of preventive maintenance that we have intergraded into our maintenance plan. We will continue to follow this newly upgraded plan and hope to see continued success. Attached below is our new reader board for McNary Heights Elementary School!
