Superintendent

ACTION

BACKGROUND INFORMATION

At our last called meeting, we discussed concerns with the Band practice / Stadium parking lot. It is seriously overgrown. When I arrived last year, it completely escaped my awareness in planning the maintenance budget. As proposals for paving were quite considerable, the quorum present at last meeting tabled the item, and asked that we explore the possibility of coordinating this work with the County paving program and bring findings back for board consideration.

We have verified with the County that 1) the County will not gear up to run a paving program until approximately April 2011; and 2) that the County works only with asphalt / aggregate (chip-seal) paving, and not paved asphalt (blacktop). The opportunity still exists to coordinate paving this lot with the work to be done this month at new OES site.

ADMINISTRATIVE RECOMMENDATION

Board members expressed a preference for a more durable solution than chip-seal on this lot. The County would not be able to assist with asphalt (blacktop) paving in any event.

Mr. Kain and I recommend considering taking advantage of the immediate paving job underway this month at OES to have this issue addressed in a quality way. This project would fall outside the balances in this year's budget and would require a budget amendment or consideration of other finance options we may have available for such projects.

APPROVAL/DISAPPROVAL
