

# Site Report – Chignik Lake – Dec-Jan. 2024

To: Superintendent Kasie Luke  
and LPSD School Board Members

From: Melody Schilke  
K-5 Head Teacher

## Outstanding Activities and Events

- Robotics came in 3rd place for the robot performance. We also received the Award for our Innovative Project on our Anti-smoking campaign. “Don’t buy a cigarette, buy a lego set.”
- Basketball Practice is in full swing. Our students are practicing daily to get ready for Basketball Camp and tournaments that are coming up.
- Our School is proud to announce our student government will begin the school store. We have already hosted several events and are excited to continue to teach business and responsibility to the students at Chignik Lake.

## Personnel

- Thank you to our Maintenance team: Clinton Boskofsky, Tom O’Domin, and Carl for working tirelessly on the sewage pump issue the housing has had.
- MacAuthor Ratliff has joined our staff as our new tutor. The students are learning and benefiting from having extra one on one instruction.

- Huge Shoutout to Diana Hejtmanek for getting a grant approved for the School. She got almost \$1000 supported by Alaska Ed through Donors Choose for P.E. equipment.
- Tara Redfox is our new Special Education Classroom Aide and P.E. Coach at the Lake the students have learned basic skills and have benefitted from having an afternoon aide in the classroom.

### **Standards Based System/Curriculum Progress**

Elementary:

Amplify Interventions are working. Using their assessments. I have 3 students who have met benchmarks for their grade level. Which is so exciting for students K-5.

Secondary:

Student attendance is increasing and students are completing their online classwork.

### **Technology Insights**

Our technology has been working fine! No needs or concerns at the moment.

### **Facility Update**

- We had a major loss within the community and the school was used to host the meal after the funeral. While this was a loss for the community, seeing the community come together for a time to heal is a somber and yet a joyful moment.
- The School also hosted our annual Christmas Play and every family brought cookies. We had cookies and Orange tang and it was enjoyed by all.

### **LSAC Activity**

Unfortunately at this time our LSAC has been unable to meet due to a family emergency that has taken our president out of the community for an extended period of time.

### **Volunteer Report**

No volunteers at this time.

### **Professional Development**

Our weekly PLC for literacy continues to keep the focus on keeping students progressing with their literacy.

### **Pupil % Attendance K-12**

Our attendance rate fluctuates from 84%-95% for the month of January and December. 84% being the lowest on those given days.

### **Student and Staff Safety**

None at this time.

### **Subsistence Calendar**

For our school to have testing after we have only been in school for two days I feel was not the best way to see how they have increased in their levels. Preferably testing could be done a week or two after we have come back.

### **Other**
