## School Board Report

### Child Care

December was a short month with the Holidays. The child care staff did manage to pull together a very darling Christmas Concert. As usual the children get stage fright when all the parents are cheering them on. We had a few brave littles who stood strong and belted out a couple songs.

January was a trying month. The kids were happy to be back but may have had a holiday hang over and eased their way back into the child care routine. Unfortunately, illness was continuously at our door. RSV took over. We had 5 students and one staff member test positive. When it comes to communicable disease we are mandated to turn it into the health department. We worked with the Community Health Nurses and they kept the state informed. The state gave us guide lines to follow as far as what guide lines to follow to keep the rest of the students and staff safe. February 10<sup>th</sup> will be our end date if we have no others test positive.

Things are looking good at the moment.
