

Executive Summary: Purchase of Amplify mCLASS with DIBELS and Boost Reading

This agenda item requests approval for the purchase of the Amplify mCLASS with DIBELS and Boost Reading programs for the 2025-2026 school year. These programs are essential components of our district's commitment to foundational literacy for all students, aligning directly with our instructional goals.

Background

Amplify mCLASS with DIBELS provides a research-based, efficient assessment system that allows our teachers to quickly and accurately identify each student's specific reading strengths and areas for growth. This data is critical for making informed instructional decisions and monitoring student progress throughout the year, ensuring we can provide timely and effective support.

Working in tandem with the assessment tool, the Boost Reading program offers a targeted intervention solution for students who require additional practice. This program is designed to deliver skill-specific support, complementing the data collected from mCLASS.

The total cost for this purchase is \$18,723.10, as detailed in the attached quote. This includes licenses for 619 students for mCLASS DIBELS and a site license for two sites for the Boost Reading program. The funds for this purchase will be allocated from our Title I budget, ensuring we are using federal resources to support our most critical instructional needs.

This investment will allow our district to continue using a proven, integrated system for literacy assessment and intervention, empowering our educators to foster confident and capable readers across the district.

Recommendation

The administration recommends the Board of Education consider the approval of the purchase of the Amplify mCLASS DIBELS and Boost Reading programs in the amount of \$18,723.10.
